ELEVATED GRID SOLUTIONS LLC

RAISING THE STANDARD | CANTON, GEORGIA | STATEWIDE SERVICE

SPECIALTY UNDERGROUND DISTRIBUTION CONTRACTOR

Company Overview

Supporting electric utilities, underground construction primes and utility contractors with defined electrical completion services across Georgia.

Core Services

Primary cable terminations and splicing; single- and three-phase transformer electrical buildouts; underground risers; cable identification, tagging and phasing; URD fault locating and repair; project-authorized testing and switching support.

Project Delivery Approach

Review plans and utility specifications; coordinate scope and scheduling; complete task-specific job briefings and work under approved procedures; record checks, issues and closeout information.

Specialized Field Operations

Dedicated utility distribution personnel and mobile equipment. Project staffing, qualifications, equipment and permitted work scope are evaluated before accepting each assignment.

Service Area & Headquarters

Canton, Georgia headquarters. Available for projects statewide, subject to scheduling and mobilization feasibility.

Scope Boundaries

No directional boring or routine trenching contracts. Overhead distribution and storm restoration are potential future growth areas, not current advertised divisions.

Prequalification

Evidence of coverage, qualifications, written safety processes, customer authorizations and references will be provided as verified and applicable. No current utility approval or certification is represented by this statement.
